

Curriculum vitae of Dane Bowen

- Digital Art Direction - User Experience Design - User Interface Design -

Who and what am I

I am a designer at heart and a problem solver by experience; I specialise in interface design and have a passion for the technology that puts it all together.

I have a love for UX and believe the perfect balance of form and function equals perfection. Design is not meant to just look pretty; it should also serve a purpose.

05 Things to know about me

05 Things to know about me

I don't work for awards; I aim for results.

When explaining my name I may have to reference a particular dog breed.

I believe that limited time equals a limited product.

4 is not something that golfers yell out; it's the handicap I'm working towards.

Quality must always take preference over quantity.

My tools and their usage

My tools and their usage

My favourite program is by far Photoshop as I find it easy to layout and enhance whatever it is I'm doing, illustrator is a close second for creating iconography and symbols that need to be scalable for any size canvas.

Dreamweaver is where I have a lot of fun bringing my creations to life with HTML and CSS. Flash use to be the tool for creating interactive experiences but times have changed and I am starting to look at new tools to enhance overall interactivity for my products.

Qualifications
